## Pointerra Signs Commercial Agreement with Datacenter

Pointerra Pty Ltd (Pointerra or the Company) has entered a Master Reseller Agreement (Agreement) with Datacenter Limited (Datacenter), a Perth-based modular data centre company.

The Agreement allows Pointerra to provide data storage services to its clients as part of its Data as a Service (DaaS) solution to manage and utilise massive 3D point cloud datasets.

As well as providing the necessary infrastructure to support Pointerra's DaaS solution, the Agreement will also generate ongoing revenue streams relating to the hosting and management of client-owned 3D point cloud data.

Pointerra Managing Director, Mr Ian Olson, said the Agreement with Datacenter was an important milestone in Pointerra's commercialisation pathway.

"We are excited to partner with an emerging business like Datacenter and believe that their innovative approach to the provision of colocation rack infrastructure will scale well with our commercialisation strategy," Mr Olson said.

"The Agreement allows Pointerra to offer a secure and scalable data hosting service as we work with our customers to host, manage and serve their valuable 3D point cloud datasets."

Pointerra is a Perth-based company, focused on building a powerful on-line DaaS solution for mapping the earth from massive 3D point clouds. Its technology allows these currently under-utilised data sets, in the public and private domain, to be easily processed, managed and shared by third parties.

Pointerra is in the process of a reverse takeover transaction with ASX-listed Soil Sub Technologies Ltd. Pointerra will be Chaired by technology entrepreneur Dr Rob Newman, and experienced company director Mr Olson will be Managing Director of the listed entity.
